Serial No.: 09/998,397 Examiner: Tuan Thai

For: **METHOD AND APPARATUS FOR LIVELOCK PREVENTION IN A
MULTIPROCESSOR SYSTEM.**

1. This action is responsive to amendment filed June 13, 2005.
Claims 1-17 are now allowed.

REASONS FOR ALLOWANCE

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record does not teach or suggest, alone or in combination, **all** the limitations of the amended claims of the current invention (claims 1, 5, 8, 9, 12 and 15), particularly an apparatus and method for preventing system resource and command conflicts in a multiprocessor system by issuing a processor command waiting to be selected for snooping; comparing an address of the processor command to addresses of all coherency blocks of prior snoop commands within a predetermined

time window; determining if the processor command and the prior snoop commands are non-pipelined; delaying sourcing of the processor command until the end of a second predetermined time window in response to the address of the processor command matching one or more of the addresses of the prior snoop command occurring within the predetermined time window, or in response to determining that the processor command is non-pipelined and one or more of the prior snoop commands occurring within the predetermined time window are non-pipelined. In light of the foregoing, claims 1, 5, 8, 9, 12 and 15 of the present application are found to be patentable over the prior arts.

Claims 2-4, 6-7, 10-11 and 13-17 further limit the indicated allowable independent claims. These claims are therefore allowable for the same reason as set forth above.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
